

Dashboard in a Day

1-Day Workshop

A packaged service to help your team acquire the skills needed to use Microsoft Power BI in your organization, at a guaranteed price and with guaranteed satisfaction.

Course Overview

- Learn how to use Microsoft's Power BI. In the first part of the session, students will learn through a series of labs and sample data how to use Power BI Desktop to author reports.
- In the second part of the session, students will use their reports to compose a dashboard and learn to share it on the Power BI Service.
- Students will use Power BI Desktop to:
 - Connect to local data and data available in the Power BI Service
 - Create data models and mash-ups: discover and combine data
 - Author a report
 - Create dashboards from report elements
 - Share reports and dashboards to a Power BI Service App workspace
- You can bring your own data and discuss the dataset to be used during the workshop with our experts in advance.

Two Options:

- **Virtual:** workshop delivered using Microsoft Teams (or similar conferencing system)
- **On Site:** our trainers come to you and train in your environment

Cost: starting at \$3,000

Intended for 10 to 15 attendees but accommodations can be made for larger groups.

Bring your own data requires a preliminary discussion between our Team and your organization event organizer in order to prepare a valid and consistent dataset to be used during the workshop

PBI Lab has priced this training without prior knowledge of the nature of the engagement and because of this, PBI Lab retains the right to decline this engagement after reviewing the specifics.

Agenda:

Morning
